ORTHOPAEDIC INNOVATION

VersaTi™ SUTURE ANCHOR

The VersaTi™ follows the same design methodology as the VersaTap™. This anchor range is available in certified medical grade titanium and can be supplied with a drill in applications where thicker cortical bone is present.

FEATURES AND BENEFITS

- **The self-tapping titanium tip with a unique cutting edge eliminates the need for a pre-tapped hole**
- **A multi-start thread leads to effortless insertion**
- **A tapering thread design improves fixation between the anchor and the bone**
- **A unique retractable silicone handle for effortless and efficient open repair surgery**

MATERIALS & SPECIFICATIONS

- Anchor Material: Certified ISO 5832-3 Medical Grade Titanium (Ti-6Al-4V)
- Anchor size: Various sizes available
- Suture Material: Two #2 Force Fibre UHMWPE braided sutures (non-absorbable)
- Needles: Four M06, half-round taper point needles (alternative options available)
- Introducer: Single-use, open-handle introducer composing of medical grade stainless steel and silicone

Available Sizes:

Item Code	Description	Sizes
ATP001	VersaTi™, Titanium, Suture Anchor	5.5mm x 17mm, W/Needles
ATP001-CH	VersaTi™, Titanium, Suture Anchor	5.5mm x 17mm
ATP002	VersaTi™, Titanium, Suture Anchor	4 x 13mm, W/Needles
ATP004	VersaTi™, Titanium, Suture Anchor	3 x 11mm, W/Needles

EXTENSIVE APPLICATION RANGE

- Used in single-row rotator cuff repair surgery
- Used as a medial row anchor in double-row rotator cuff repair
- The anchor range can be used in shoulder, elbow, wrist, knee and ankle surgery
- Anchor size and shape variations to ensure optimal fixation for large and small-joint repair
- Well suited for all general surgical solutions
